Square Golf Ball On The Green

The Square Golf Ball has been incorporated into a nice customized pen set, titled Square Golf Ball On The Green. Visit Custom Gifts on this web site to see complete details. Finally, a gift that is both functional and personal – and which is not available any place else! The ability to personalize this gift makes it very special, and memorable. The pen is a special “golf club” pen, completing the theme full circle. Three separate areas are available for custom imprinting, and all three can be unique, and should be unique. Great for a family member or an office friend. The Square Golf Ball On The Green works well as a corporate gift item also. Check out the photos on this site, and maybe include or opt for the Fun Pac – two regular golf balls and one Square Golf Ball each imprinted – a gift that combines a useful item (the two golf balls) and a truly unique novelty item (The Square Golf Ball). Either way, you’ll have a personalize gift that is most certainly different, something they don’t have already, and which is memorable. And unlike almost every other custom imprint outlet, with us you can buy just one. For example, we custom imprint regular golf balls as well. Try finding an outlet where you can buy just one, or even a half dozen with your custom message. Good luck with that search, plus be ready for their hefty set-up fees (which we do not have).
