### Bright Valley Enterprises Offers More

The Square Golf Ball® is not the only product offered through Bright Valley Enterprises. [www.usacustomimprints.com](http://www.usacustomimprints.com) allows custom imprinting on a variety of items, and unlike all others, the minimum order is ONE, without any hefty fees for the low volume order. Another product line involves education. [www.culinarybusinessinstitute.com](http://www.culinarybusinessinstitute.com) will detail the culinary business instruction modules we offer. Bright Valley Enterprises does not offer culinary arts training (we do not teach HOW to cook) however we do provide instruction to individuals who have culinary skills (formal or not) on how to start and operate a successful home-based culinary business. Great cooking is a must if you want to earn income through your meals, but equally as important is the business foundation and skills applied. Without a good sense of business and organization, the entire business idea you envisioned is in jeopardy. Courses cover three main areas – Personal Chef Service, Dinner Parties and Commercial Kitchens. We also provide instruction on how you may become a culinary instructor. There is a genuine quest for culinary know-how. That is why there are so many cooking shows, especially on cable. At the grocery store, there are now as many cooking magazines as fashion magazines, which used to dominate the shelf. It may seem odd – culinary business education alongside The Square Golf Ball®. Simple truth is that at Bright Valley Enterprises, we have detailed and thorough knowledge of both, so while the buyer of one may not be a buyer for the other – you just never know. And that's why we've shared this knowledge with you here.
