

THE

SQUARE

GOLF BALL

July 3, 2015

Class Reunions

The Square Golf Ball® has been utilized by both High School and College level reunions, plus a few family reunions also. Reunions are a time to gather, remember and celebrate. Nothing replaces the standard group photo, but it's a very nice gesture to have a memento for each participant to take home and have as a reminder of that special time and event. The Square Golf Ball® offers perhaps the best possible memento, because of its unique and contagious appearance, plus having the ability to imprint a nice block of text with date, school logo/mascot, etc – this becomes the gift that is remembered long after the reunion because The Square Golf Ball® has an excellent chance of remaining on a desk or out in the open, thus causing more conversations and stories with others as they see and ask about this strange looking object. Schools can have a bunch of Square Golf Balls® produced that are “standard” or for each person, and then create a few special units for all the typical contests – traveled the farthest, longest married couple, class president, star athlete or whatever your group designates as special mentions and awards. Nothing, and we're pretty sure nothing else compares with The Square Golf Ball® in this situation – and the low price makes it a win-win for everyone involved. The Square Golf Ball® was initially conceived in 1995 while discussing golf. A poor day of putting spurred a comment by the now inventor about how a square golf ball wouldn't roll past the cup. After some laughs, the inventor sketched a rough design and even put the name “The Square Golf Ball®” on the sketch. The idea was filed away with no real pursuit. When the internet found its way into the scene, searching for all types of things became easier and easier. The inventor searched for this square golf ball item believing it must have been thought of before now. Searches went on, and finally in early 2012, after extensive and exhaustive searching, the original concept and name from 1995 came to life and the rest as they say, is history.
