

THE

SQUARE

GOLF BALL®

The Square Golf Ball® becomes a “Virtual Cup”. Here’s how:

When the practice putting green is overloaded (or even when it’s not), you can use The Square Golf Ball® as a virtual cup by placing it wherever on the green (slope or no slope - it won’t roll), then putt “to” The Square Golf Ball®. If you can in any way touch The Square Golf Ball® with your putt, you have made the hole. Think of this as fine tuning your talents on the green. If you can hit or skim by The Square Golf Ball® with your practice putts, you’ll be dead on when aiming for a cup that is 3 times the width of The Square Golf Ball®. Try it. You’ll see the benefit and challenge - and hopefully this little exercise will cut a stroke or two from your day on the links.
